

Bicycle Owners

Delta Land Developments has installed a fob on the Cordova Street loading bay door to allow residents to use this door to take bicycles in and out of the building without using the parking garage ramps or the main elevators.

You will now be able to take your bicycle out of the bike storage rooms using the service elevator and the loading bay door (Cordova Street side)

We are delighted with this alteration which will make it so much easier for cyclists to get their bikes in and out of the building.

You can pick up your fob starting on Monday September 14th.

One fob has been allocated per suite.

Note:

The door is programmed to stay open between the hours of 6 am and 3 pm daily. You will not need to use your fob during this time. Outside of those hours, the fob will open the door and it will close automatically behind you.

ENJOY!
