Garbage Procedures

We are taking action to resolve the odour and fruit fly problems that have plagued our garbage disposal area creating discomfort and potential health risks.

Over the next week, we have asked our service company to wash and sanitize the inside and outside of the garbage compactor in the P2 level garbage room.

While the compactor is out for service, Bruno will be power-washing the walls, floor and ceiling of the garbage room.

We will be getting new bins for our recycled materials and will be covering the top of the hopper to reduce odour and spillage.

WE NEED YOUR HELP TO SUCCEED IN THE EFFORT TO IMPROVE THE SANITATION IN THE GARBAGE ROOM

1. Garbage must be securely bagged before being deposited in the chute. (no open spaces at the top of the bag and no leakage from the bag)
2. Kitty litter must not be disposed of in the chute, it must be double bagged and taken to the garbage room and thrown in the hopper

We will monitor the situation two weeks from now to see if the problem has been resolved. If the problem persists, we will have to take further steps to address the odour and health risk problems in our garbage room.

For any further questions or concerns regarding this matter, please contact the undersigned in writing.

Sincerely,
COLLIERS MACAULAY NICOLLS INC.
Managing Agent
